

Listing of the Claims:

Following are the claims as amended herein and as are currently pending for consideration:

C1
1. (Previously Amended) A method for displaying an Electronic Programming Guide (EPG) comprising:

generating a three dimensional virtual mesh polyhedron;
generating a plurality of planes positioned in said polyhedron, said planes being approximately parallel, said polyhedron having a first object on a first plane and a second object on a second plane, said objects providing interactive surfaces.

C2
2. (Original) The method of claim 1, wherein said polyhedron is displayed with an isometric view.

3. (Previously Amended) The method of claim 1, wherein said EPG is generated exclusive of three dimensional graphics circuitry.

C3
4. (Previously Amended) The method of claim 1, wherein selection of one of said objects will select a program provided on a certain channel at a certain time.

5. (Previously Amended) The method of claim 1, wherein said objects are independent of said polyhedron.

6. (Previously Amended) The method of claim 1, wherein said objects represent certain television program on a certain channel at a certain time.

C4
7. The method of claim 1, wherein said polyhedron is a cube.

8. (Currently Amended) The method of claim 1, wherein said ~~planes~~ surfaces are parallel stationary.

C4 9. (Original) The method of claim 1, wherein said planes correspond to levels of preference.

C5 10. (Previously Amended) The method of claim 1, wherein one of said objects a pictogram.

11. (Original) The method of claim 7, wherein said cube further comprises three axes.

C6 12. (Original) The method of claim 11, wherein said axes correspond to time, channel, and user preference.

C7 13. (Previously Amended) An Electronic Program Guide (EPG) comprising:
a three dimensional virtual mesh polyhedron comprising a plurality of planes, said planes being approximately parallel; and
said polyhedron having a first object on a first plane and a second object on a second plane, and said objects providing interactive surfaces.

14. (Original) The EPG of claim 13, wherein said polyhedron is displayed with an isometric view.

C8 15. (Original) The EPG of claim 13, wherein said EPG is displayed exclusive of three dimensional graphics circuitry.

C9 16. (Previously Amended) The EPG of claim 13, wherein the selection of one of said objects will select a program provided on a certain channel at a certain time.

17. (Previously Amended) The EPG of claim 13, wherein said objects are independent of said polyhedron.

18. (Previously Amended) The EPG of claim 13, wherein said objects represent a certain television program on a certain channel at a certain time.

19. (Original) The EPG of claim 13, wherein said polyhedron is a cube.

C¹⁰
20. (Currently Amended) The EPG of claim 13, wherein said ~~planes~~ surfaces are ~~parallel~~
stationary.

21. (Original) The EPG of claim 13, wherein said planes correspond to levels of
preference.

C¹¹
22. (Previously Amended) The EPG of claim 13, wherein one of said objects is a
pictogram

23. (Original) The EPG of claim 19, wherein said cube further comprises three axes.

C¹²
24. (Original) The EPG of claim 23, wherein said axes correspond to time, channel, and
user preference.

25. (Previously Amended) A system for displaying an Electronic Program Guide (EPG)
comprising:

C¹³
a memory; and
a first unit to generate a three dimensional virtual polyhedron; and
said first unit to further display a plurality of planes positioned in said polyhedron,
said planes being approximately parallel, said polyhedron having a first object on a first
plane and a second object on a second plane, and said objects providing interactive
surface.

26. (Original) The system of claim 25, wherein said polyhedron is displayed with an
isometric view.

C¹⁴
27. (Original) The system of claim 25, wherein said EPG is displayed exclusive of three
dimensional graphics circuitry.

28. (Previously Amended) The system of claim 25 wherein the selection of one of said objects will select a program provided on a certain channel at a certain time.

C¹⁵ 29. (Previously Amended) The system of claim 25, wherein said objects are independent of said polyhedron.

30. (Previously Amended) The system of claim 25, wherein said objects represent a certain television program on a certain channel at a certain time.

31. (Original) The system of claim 25, wherein said polyhedron is a cube.

C¹⁶ 32. (Currently Amended) The system of claim 25, wherein said ~~planes~~ surfaces are parallel stationary.

33. (Original) The system of claim 25, wherein said planes correspond to levels of preference.

C¹⁷ 34. (Previously Amended) The system of claim 25, wherein one of said objects is a pictogram.

C¹⁸ 35. (Original) The system of claim 31, wherein said cube further comprises three axes.

36. (Original) The system of claim 35, wherein said axes correspond to time, channel, and user preference.

C¹⁹ 37. (Previously Amended) A machine readable medium having stored thereon sequences of instructions which are executable by a processor, and which, when executed by the processor, cause the system to perform a method for displaying an Electronic Programming Guide (EPG) comprising:

generating a three dimensional virtual mesh polyhedron; and

C19 generating a plurality of planes positioned in said polyhedron, said planes being approximately parallel, said polyhedron having a first object on a first plane and a second object on a second plane, said objects providing interactive surfaces.

C20 38. (Original) The machine readable medium of claim 37, wherein said polyhedron is displayed with an isometric view.

39. The machine readable medium of claim 37, wherein said EPG is displayed exclusive of three dimensional graphics circuitry.

40. (Previously Amended) The machine readable medium of claim 37, wherein the selection of one of said objects will select a program provided on a certain channel at a certain time.

C21 41. (Previously Amended) The machine readable medium of claim 37, wherein said objects are independent of said polyhedron.

42. (Previously Amended) The machine readable medium of claim 37, wherein said objects represent a certain television program on a certain channel at a certain time.

43. (Original) The machine readable medium of claim 37, wherein said polyhedron is a cube.

C22 44. (Currently Amended) The machine readable medium of claim 37, wherein said ~~planes~~ surfaces are ~~parallel~~ stationary.

45. (Original) The machine readable medium of claim 37, wherein said planes correspond to levels of preference.

C23 46. (Previously Amended) The machine readable medium of claim 37, wherein one of said objects is a pictogram.

47. (Original) The machine readable medium of claim 43, wherein said cube further comprises three axes.

48. (Original) The machine readable medium of claim 47, wherein said axes correspond to time, channel, and user preference.
